replenish what's lost over time

An attractive face is typically defined by smooth contours, high cheekbones and a defined jawline.[1] The overall shape and contour of the face, however, changes with age.[1] As facial volume is gradually lost, the skin becomes thinner and the effects of gravity can become apparent.[2] One of the most noticeable changes that occur to the face over time is the loss of volume or fullness.[1] This may lead to flattening of features and hollowing of the cheeks.[1,3]

refresh what nature gave you

The newest trend in the science of facial rejuvenation is replacing lost volume to restore and enhance the youthful contours of the face.[1,2] JUVÉDERM® VOLUMA® is a specialized product from JUVÉDERM®. JUVÉDERM® VOLUMA® uses hyaluronic acid, a sugar that occurs naturally in your skin, to instantly restore lost facial volume in the cheeks and contour the chin and jawline area.[1,5] The hydrophilic properties of hyaluronic acid allow it to attract and attach to water molecules, which moisturizes the skin and helps improve its elasticity.[1] JUVÉDERM® VOLUMA® provides results that are natural looking and last for up to 18 months.[1]

frequently asked questions

How long does JUVÉDERM® VOLUMA® last?

JUVÉDERM® VOLUMA® provides results that last up to 18 months.[1]

How long does treatment usually take?

After consulting with your doctor, the actual injection process is quick and easy, and takes only about 15 to 60 minutes, depending on the areas treated.

How long before I see results?

Most people see an immediate improvement to the treated area.[6]

What is the recovery time after a treatment?

JUVÉDERM® VOLUMA® is generally well tolerated.[1,3] Most people can resume normal activities immediately. Possible side effects are mild to moderate and are relatively short lasting (less than seven days).[5] These may include temporary skin reactions such as redness, swelling, tenderness and bruising.[5] Your doctor will advise you on your post-treatment care and when you can resume your normal activities.

See Safety Information on back page for detailed side effects of JUVÉDERM® VOLUMA®.

revitalize your natural look with JUVÉDERM® VOLUMA®

- JUVÉDERM® VOLUMA® used to enhance cheeks and contour jawline[5]
- lips enhanced and smile lines softened with JUVÉDERM®[7,8]

- JUVÉDERM® VOLUMA® used to enhance cheeks and contour jawline[5]
- lips enhanced and smile lines softened with JUVÉDERM®[7,8]

*In addition to JUVÉDERM® and JUVÉDERM® VOLUMA®, the women in these after photos received a wrinkle-smoothing injectable to treat the eye and forehead areas. Actual treatment results may vary.

safety information

Potential side effects associated with JUVÉDERM® products include redness and swelling at the injection site which may be associated with itching and pain on pressure to the area. These reactions may occur immediately or may be delayed, and may last for up to a week. If these reactions persist for more than one week or if you have any other effects which concern you, seek medical attention as soon as possible. Other possible side effects include hematomas, firmness or bumps at the injection site, staining or discolouration at the injection site, and a weak filling effect. As with any injection of a medical device, there is an associated risk of infection. Cases of tissue damage in the forehead region, abscesses, nodules, and immediate or delayed hypersensitivity after injections have been reported. You should not use a JUVÉDERM® product if you scar frequently, are hypersensitive to hyaluronic acid, or are pregnant or breastfeeding. JUVÉDERM® products are not approved for use in children. Tell your doctor if you have an ongoing skin infection in the area to be treated, if you have recently had other skin surface treatments, have previously used fillers, or if you are currently taking any medications. Tell your doctor if you have an autoimmune disease, allergies, or a history of streptococcal infection or rheumatic fever. Tell your doctor if you have epilepsy, porphyria, or heart disease, or if you are hypersensitive to lidocaine or other local anaesthetics, as JUVÉDERM® products containing lidocaine may not be appropriate for you. For any unexpected effects following injection of a JUVÉDERM® product, contact your doctor.
